

HOW TO SCREEN OUT A BAD TECHNICAL RECRUITER

- Did the recruiter take the time to review your background?
- Does the recruiter respond promptly?
- Does the recruiter know tech and understand the role he/she is working on?
- Is the recruiter forthcoming and transparent with you?
- Is your recruiter careful not to pressure you?
- Does the recruiter advocate for you and support you throughout the process?
- Does the recruiter stick around to make sure everything goes smoothly *after* you sign on the dotted line?.
